his smile

Mike called them “butt-ugly” teeth

Pre op view

A top-down view of a dental wax up, showing a complete dental arch. The wax is a light, off-white color and has a smooth, slightly glossy texture. The teeth are arranged in a natural, symmetrical pattern, with the central incisors at the front and the molars at the back. The wax up is set against a dark, solid background. The text "Top view of wax up" is centered over the middle of the arch.

Top view of wax up

A diagnostic wax up is done to plan in detail. This allows me to know what can be accomplished in the mouth and communicate that to the patient and the laboratory.

A dental model of a maxillary (upper) dental arch. The model is light-colored and shows the arrangement of teeth. There is a significant gap between the central incisors, which is characteristic of a diastema. The text "Pre op view" is centered on the model.

Front view of lower wax up

Wax up is used as a template for making the provisional restorations

Mike liked
His smile
Even in
provisionals

Provisional restorations look like Porcelain restorations

Provisionals function like Porcelain restorations as well

Empress Porcelain restorations on the model resemble the wax up and the provisionals.

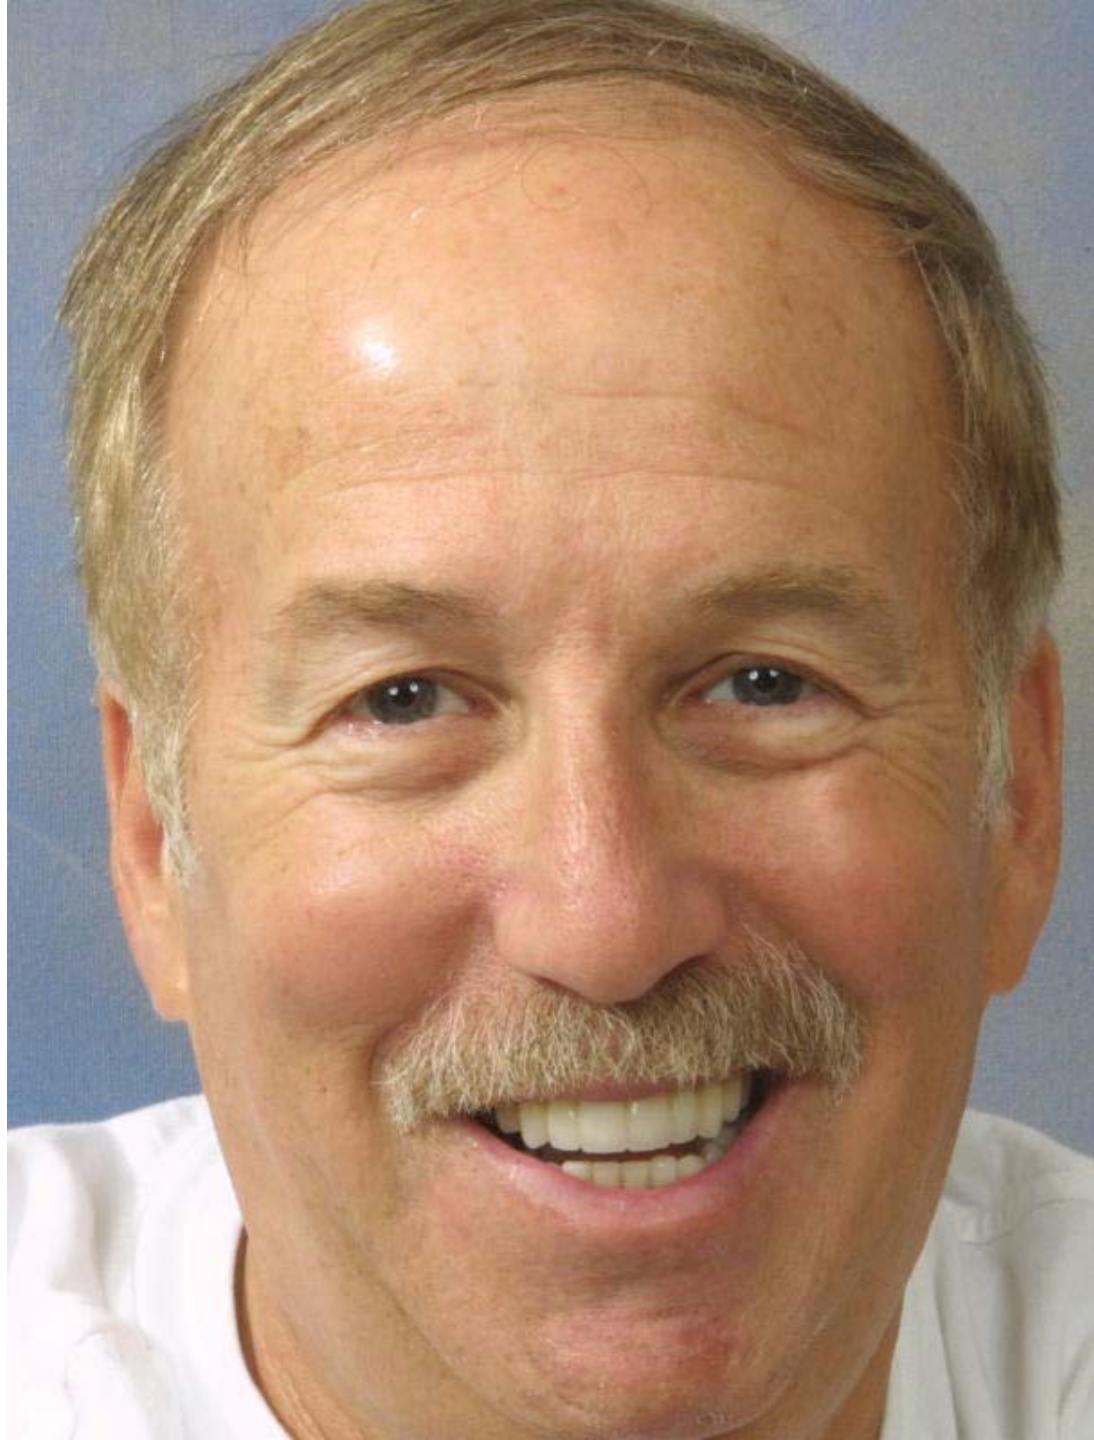

The biting edges were lengthened in Porcelain to get better aesthetics after the provisionals were done.

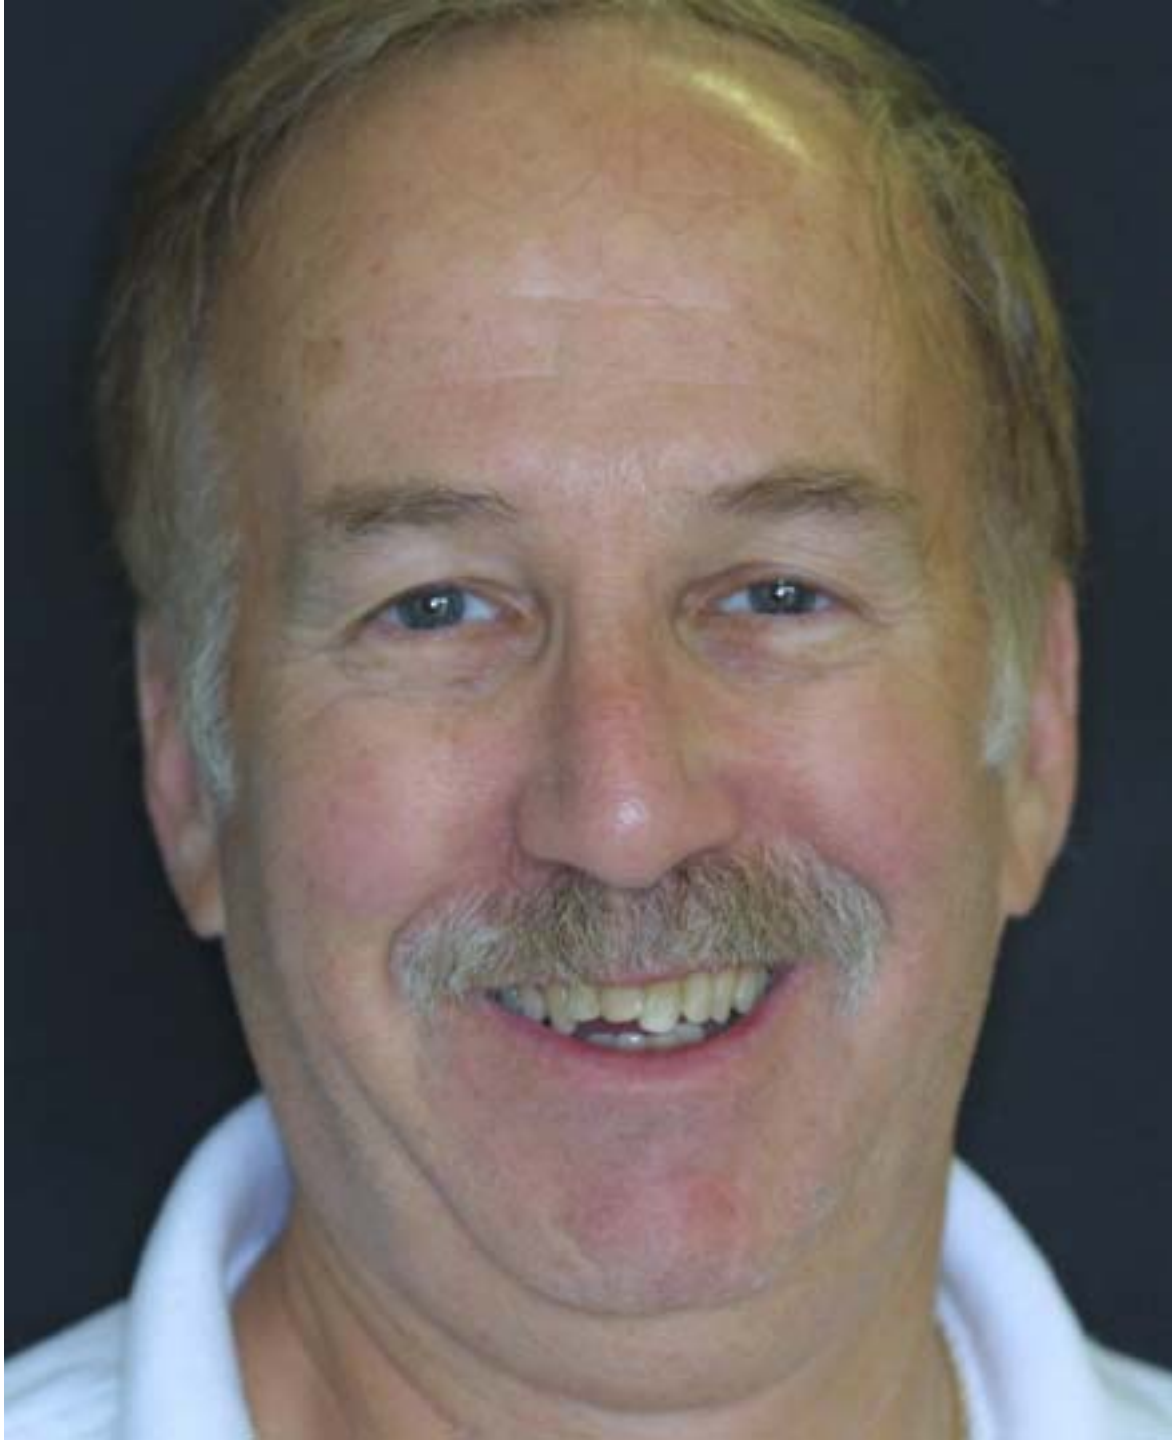

Corrections can be made with the Wax up preview.
An additional tooth was also restored to get the best results, after reviewing the wax up.

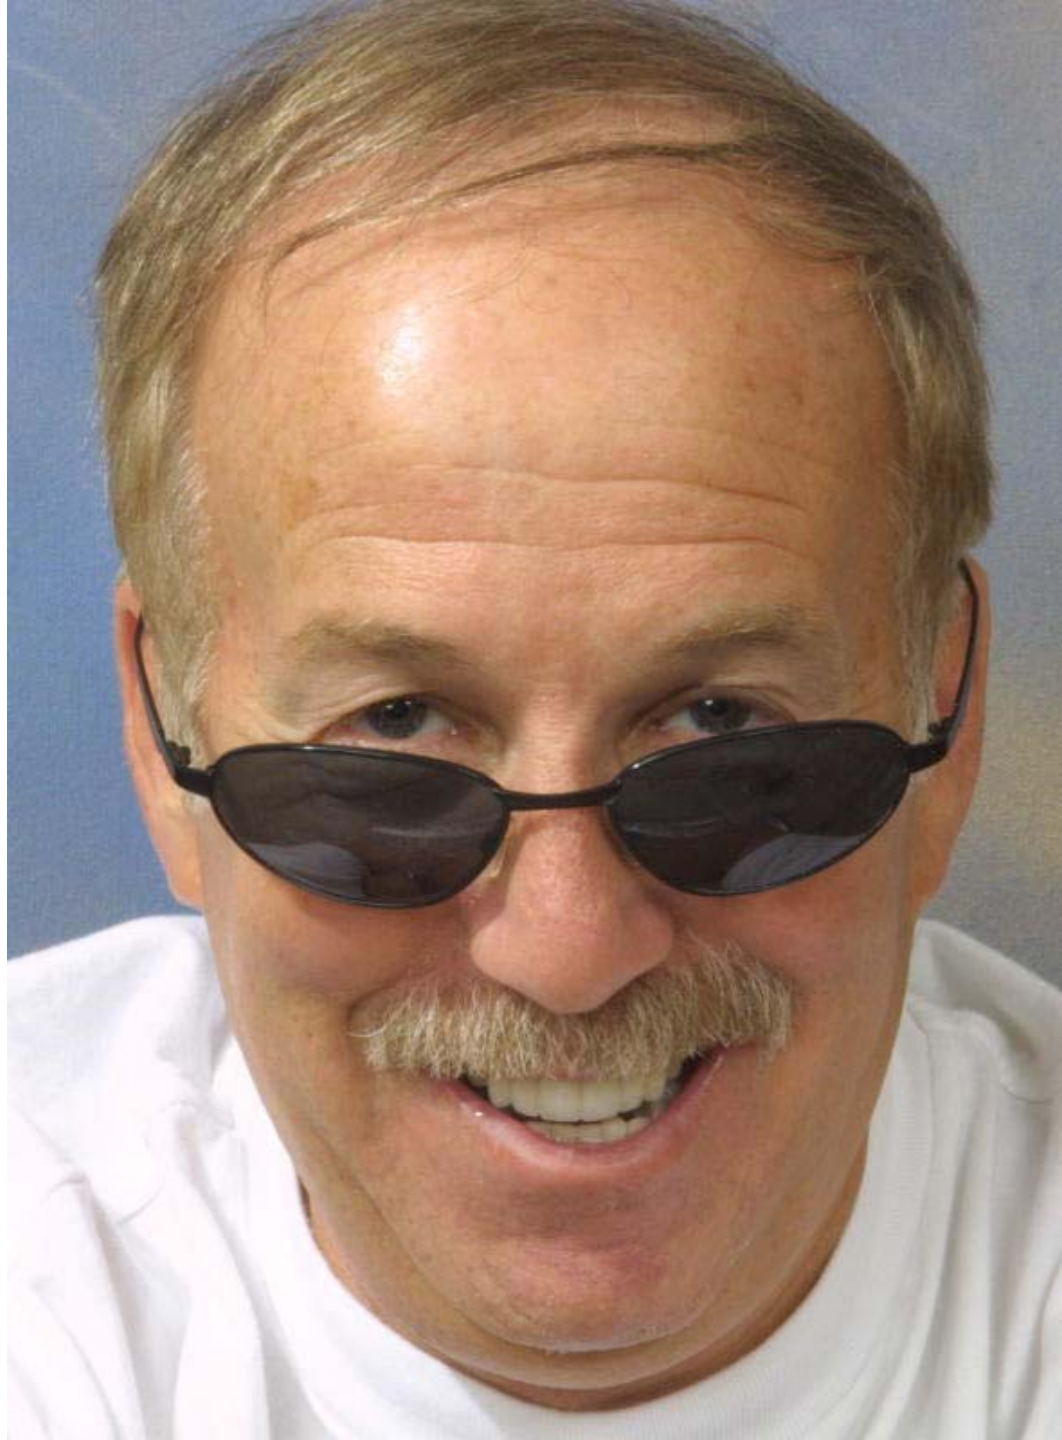

A bright sun is positioned in the upper right quadrant, shining through a large, fluffy white cumulus cloud. The sun's rays create a lens flare effect across the sky. The sky is a clear, vibrant blue, and the cloud has a soft, textured appearance with some darker shadows within its folds. The overall scene is bright and clear, suggesting a sunny day.

Confident smiles after Empress Porcelain restorations

Success Story:

I have always had bad teeth.... I could never improve the image of a misshapen smile. What Prabu and the team did not only changed my smile but gave me a set of teeth that I could be proud of. .

This procedure really was more of a success than I could have imagined.

The team here deserves very high praise for not only Their professional skills but their genuine concern for Their patients.

- Mike N.

Conclusion

- With the advanced techniques in Aesthetic dentistry, a beautiful, confident smile can be yours in just a few weeks.
